ENOW

Microsoft 365 Governance & Adoption

Who's using what? How are they using it?
Are we compliant?

ENow's Adoption & Governance Module provides granular visibility into Microsoft Teams, Exchange, SharePoint Online, and OneDrive usage so you can increase adoption while ensuring compliance requirements are being met.

Although Microsoft does provide limited visibility via native tools and its numerous admin centers, a substantial amount of manpower is required to find relevant data, and often the data is unsubstantial and not detailed enough to meet your organization's reporting requirements. With ENow's Adoption & Governance module, you can quickly and easily access the data you need around Microsoft Teams, Exchange, SharePoint Online and OneDrive usage through one customizable dashboard.

From this vantage point, you'll be properly equipped to tackle governance-related issues, combat Microsoft Teams sprawl, and identify Microsoft Teams without owners. You'll gain a complete understanding of your MIcrosoft ecosystem, who is accessing your organization's resources and how, while enabling you to better report on creation and deletion events.

Discover the Power of Data & Maximize Efficiency

Gain invaluable insight into Microsoft 365 utilization within your organization. Our solutions empower you to confidently streamline operations, reduce costs, and enhance productivity. Efficiently replace redundant technologies and optimize resources to save costs. Identify areas where employees require training, fostering a more productive workforce.

ENow's Adoption Center enables you to:

Quantify ROI

Measure the return on investment of Microsoft 365 by tracking employee utilization and efficiency.

Address Adoption Challenges

Pinpoint areas where users require additional support or training, enabling targeted interventions for smoother adoption.

Boost Collaboration and Productivity

Uncover usage patterns to enhance collaboration and productivity across teams.

Enhance User Satisfaction

Identify and address user frustrations and inefficiencies to improve overall user experience.

Accelerate Digital Transformation

Drive organizational digital transformation through strategic adoption of Microsoft 365 tools.

Inform Decision-Making

Utilize insights to make informed decisions about tool investment, retirement, and resource allocation, driving organizational success.

About ENow Software

Stay Productive. Stay Secure. Stay Ahead.
ENow optimizes the service delivery of mission critical Microsoft collaboration and identity infrastructure. Our digital experience monitoring and analytics for Entra ID, Active Directory, and Microsoft 365 transforms the way IT supports these complex services, which enable organizations to improve service delivery, increase workplace productivity, and lower total cost of ownership while maintaining robust security against unauthorized access.
